Probing The Archeology of the Future - Evolution Into the New Millennium

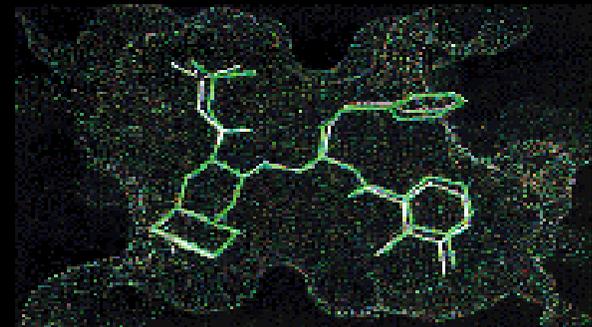

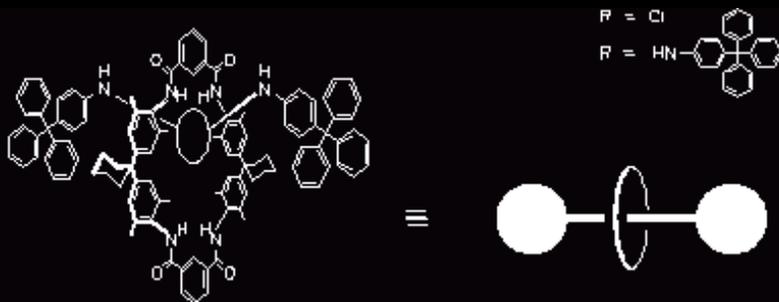

- Technology Convergence
- Cultural Morphology
- Economic Drivers
- Belief Systems

Convergence Syndrome

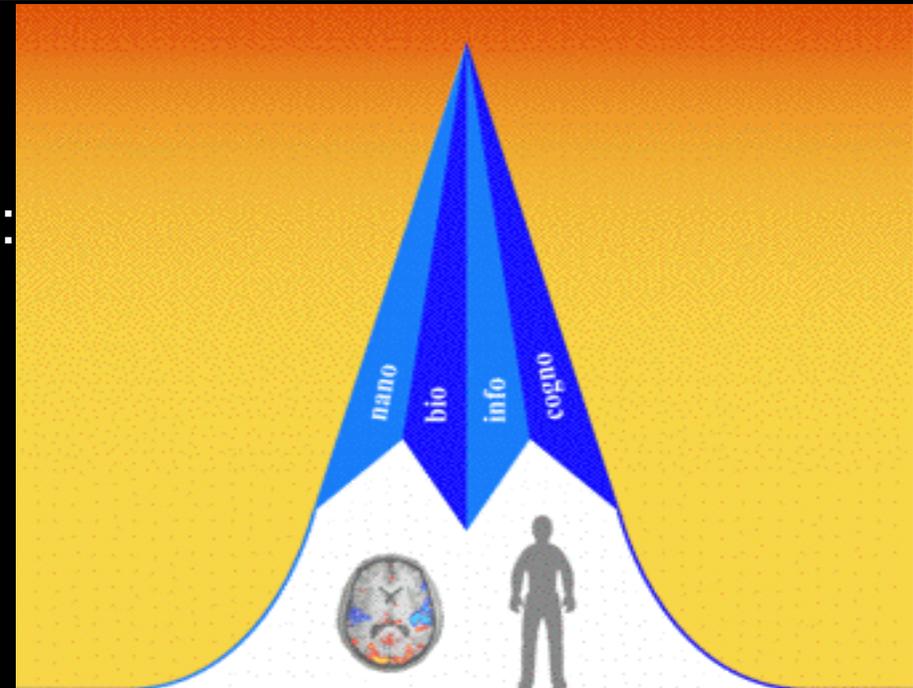

- It is here, at this evolutionary event horizon, that we, the human species, evolve into a realm where the interface boundary between the real and the virtual, the organic and the synthetic, become seamlessly infused into an ever evolving symbiosis of our own creation, and what evolves henceforth.

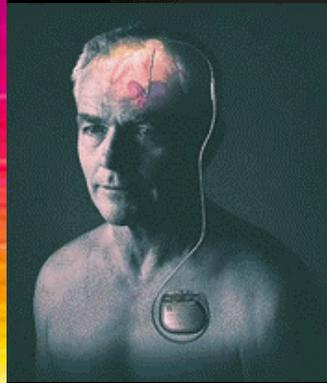

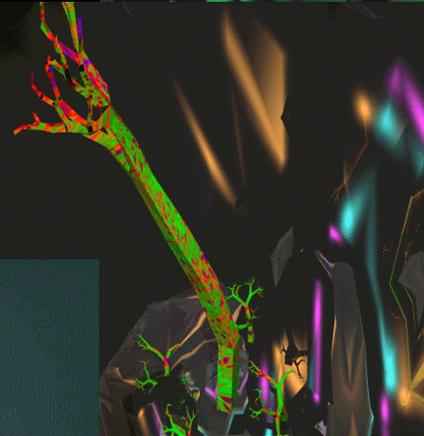

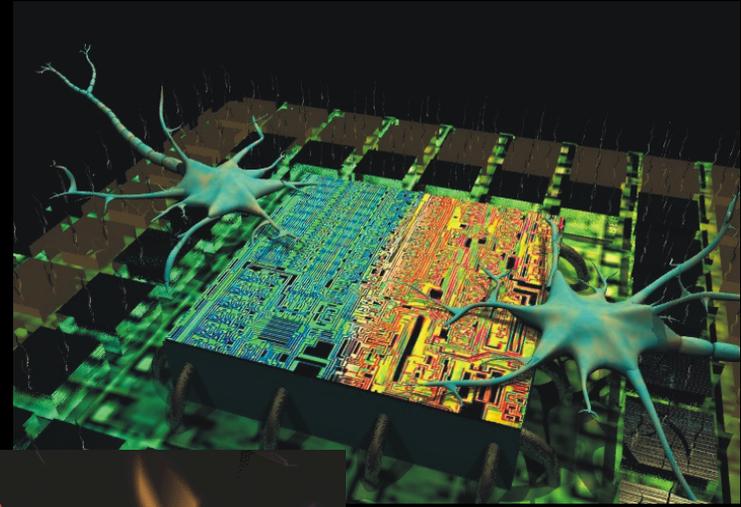

The Emergent Infotech / Biotech / Nanotech / Cognotech Operational Ecology

Nanotechnology Enabled Human Enhancement, Human / Machine Interface

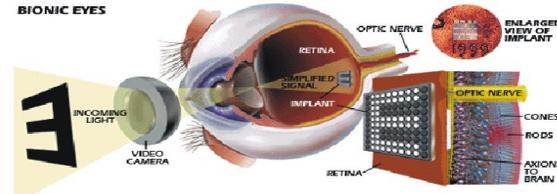

- Nano-enhanced tissue
- “Smart” healing nano devices
- Biochip / integrated implants
- Neuro-prosthetics
- Extended sensory capacities
- Extreme “hardened” endurance
- Enhanced performance

Co-Evolution with Emergent Intelligences
 Genetic / Biophysical Enhancement
 Accelerated Environmental Adaptation
 Extended Longevity & Functionality

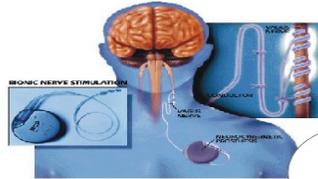

Biocompatible Molecular Surfaces / Interface

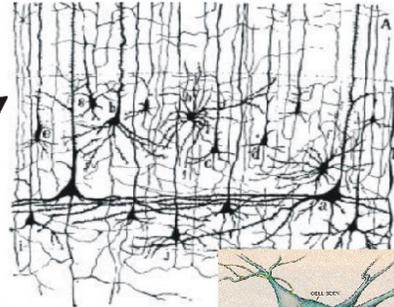

Complex Integrated Biodevice / Functional Restoration

Nano Bio

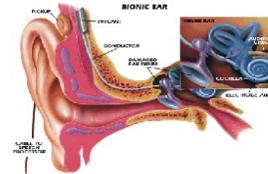

Biodevice / Implant System Interface

Nano Info Bio

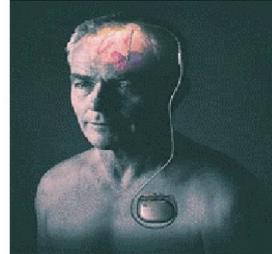

Neural Mapping

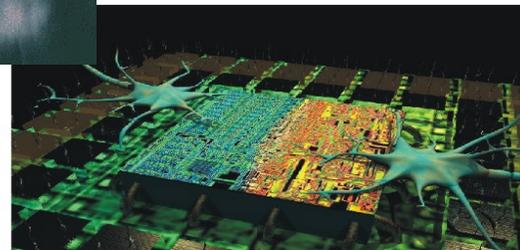

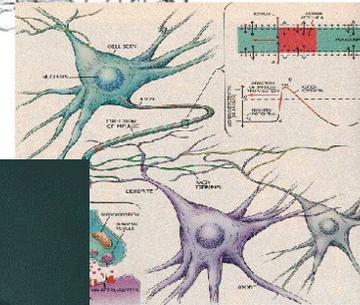

Nano Cogno Bio

Cellular / Neural Repair

Cogno Nano Bio

Cellular / Neural Interface

Extended Sensory Capacity
 Intellectual / Cognitive Capacity
 Strength, Endurance Attributes
 Extended Longevity

Process Dynamics of the Next Evolutionary Eventhorizon

Complexity Management
Extended Life Productivity

The Emergent Operational Ecology – Translation into Virtual Nature

- Psycho-ergonomic cuing threshold factors
- Phenomenological causality linkages
- The invocation of rapture index

Existence Imperatives of the Evolutionary Eventstream

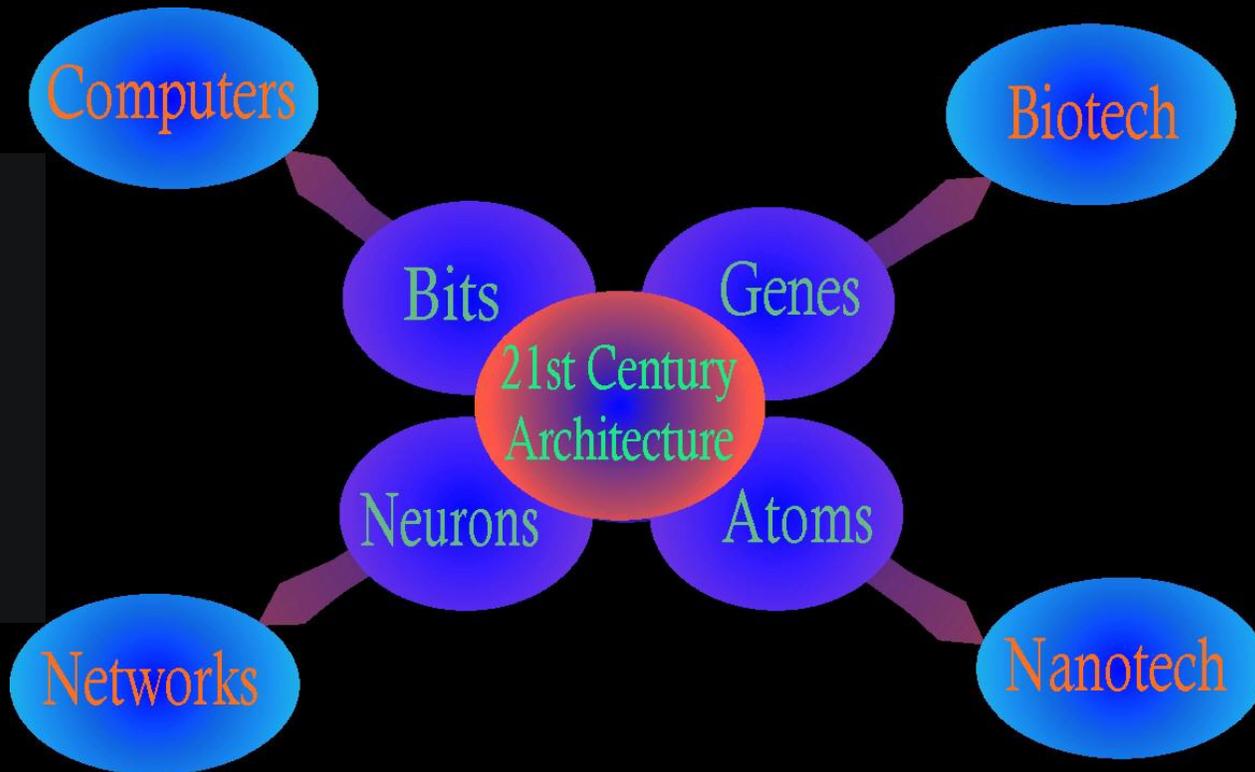

- Across virtually every known cultural, societal, and geographic variation of human civilization, one singular commonality has been consistently ubiquitous: an emotional, if not spiritual engagement with the aesthetic content in nature which transcends mere logical lexicon or reasoned response.
- Embedded within the innermost sanctum of the human psyche, there is an emotional engagement phenomena which I refer here to as the "*invokation of rapture*" index.

Think Different . . .

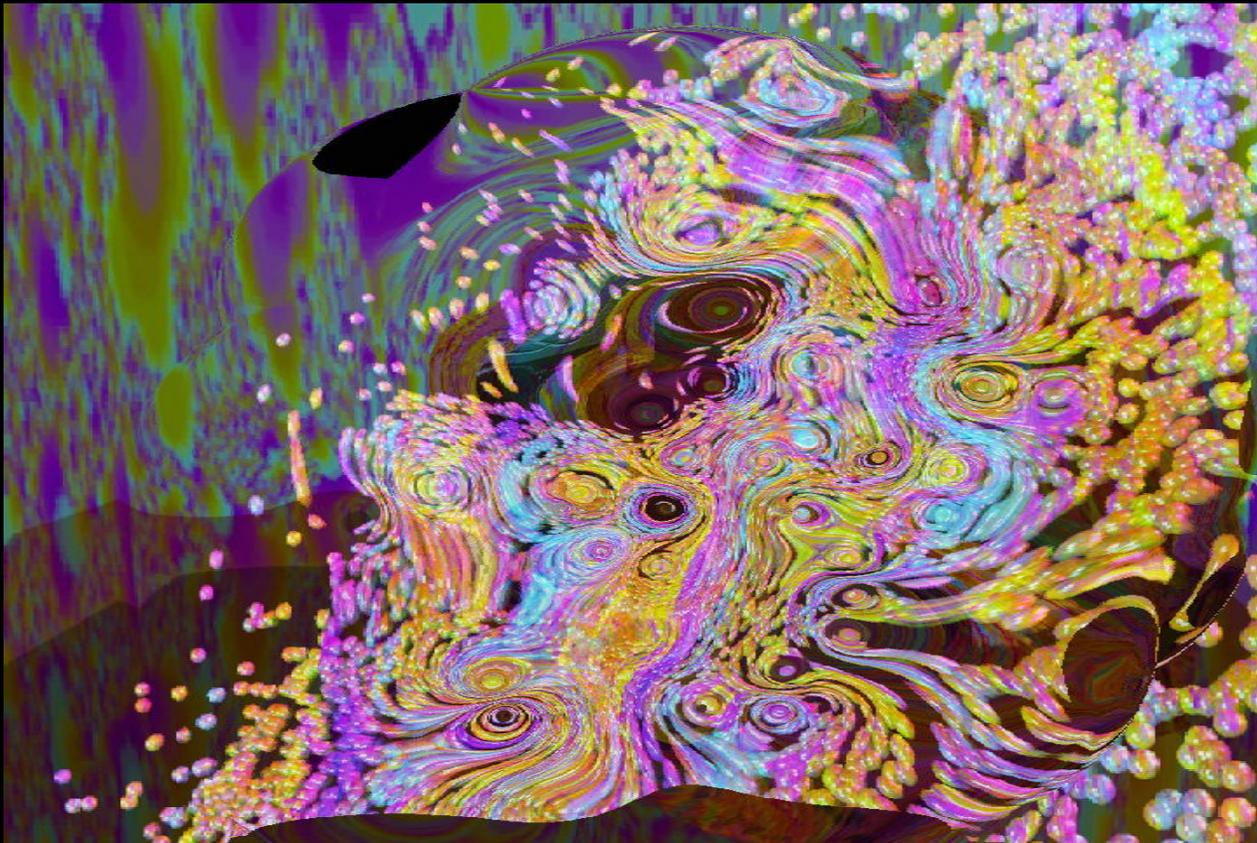

Think Holographic

- Emergent NBIC infrastructure is an evolving architecture of interrelated disciplines, technologies, organizational systems

The Holographic Perspective

- All living things are systematically interconnected
- Definition of “living things” extends to systems, processes, entities which behave biologically

Evolutionary Eventstream Imperative

- Emergence of “synthetic entities” as a culture norm
- Crossing of an evolutionary eventhorizon
- Peer to peer tele-existence streaming
- Hybrid biological systems integration

Ananova:

Who is she and
what makes her tick?

Virtual Humans - This is “Sylvie”

- She can market products, be a secretary, a help aid
- She can have any face, a programmable personality
- She is a connection interface to a higher, scalable intelligence

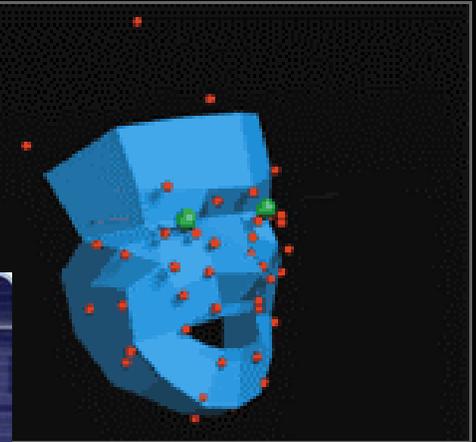

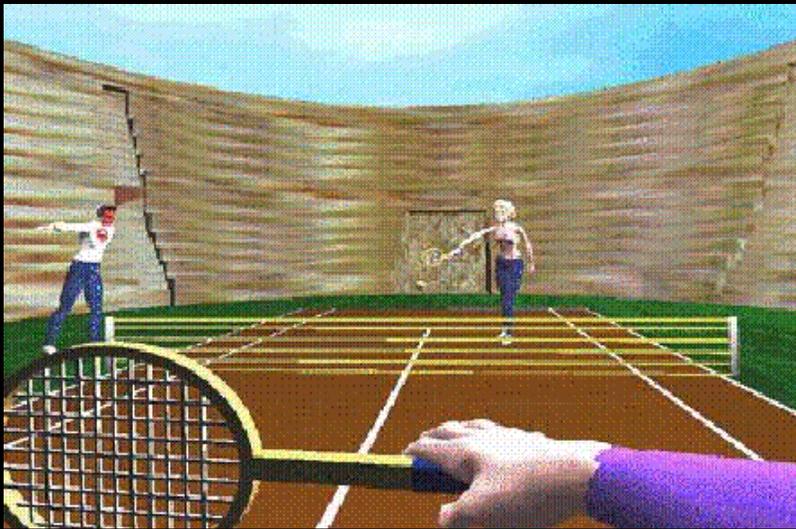

Virtual Humans - This is “Marilyn”

- The “invokation of rapture” effect in human form

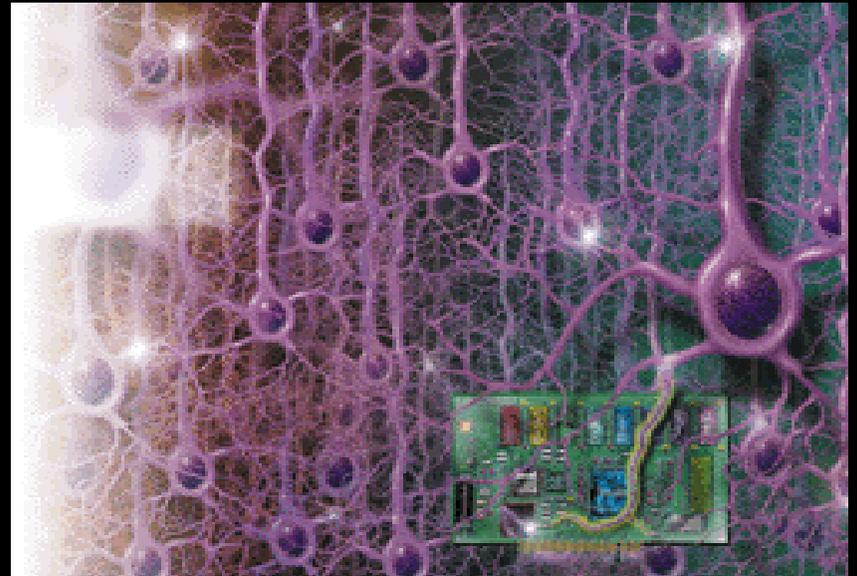

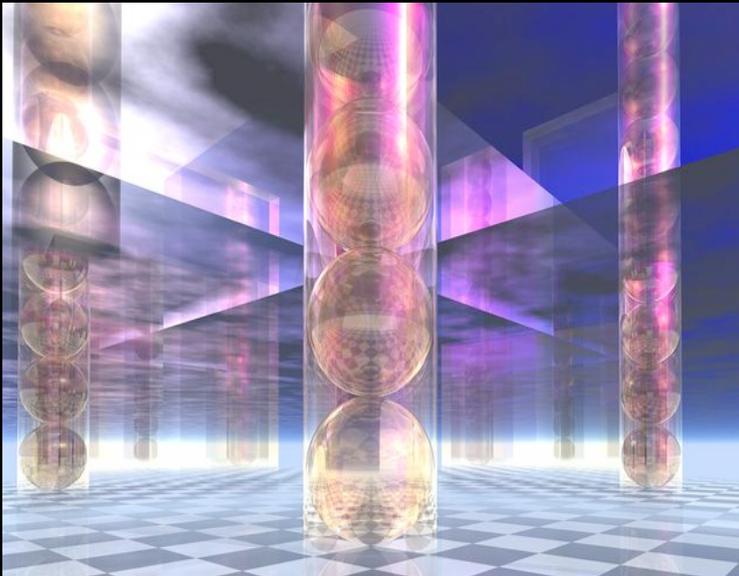

The Business of Virtual Humans

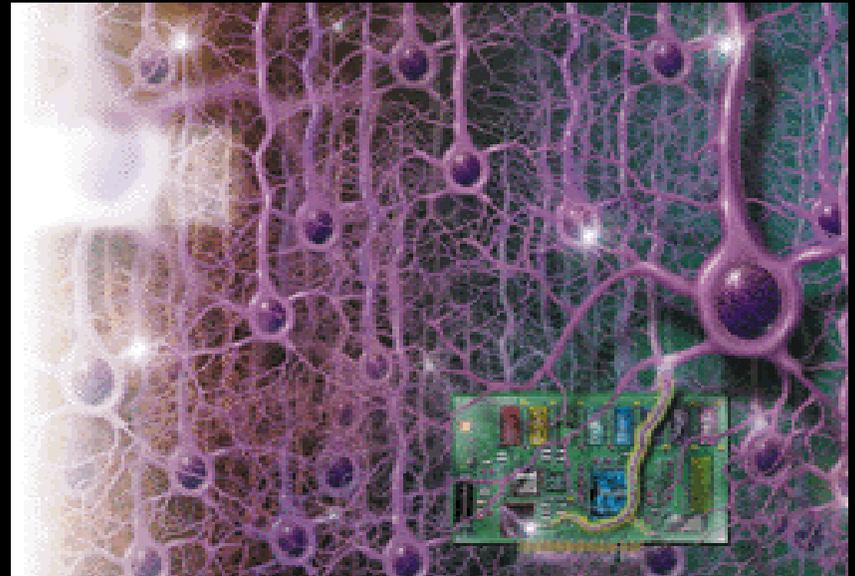

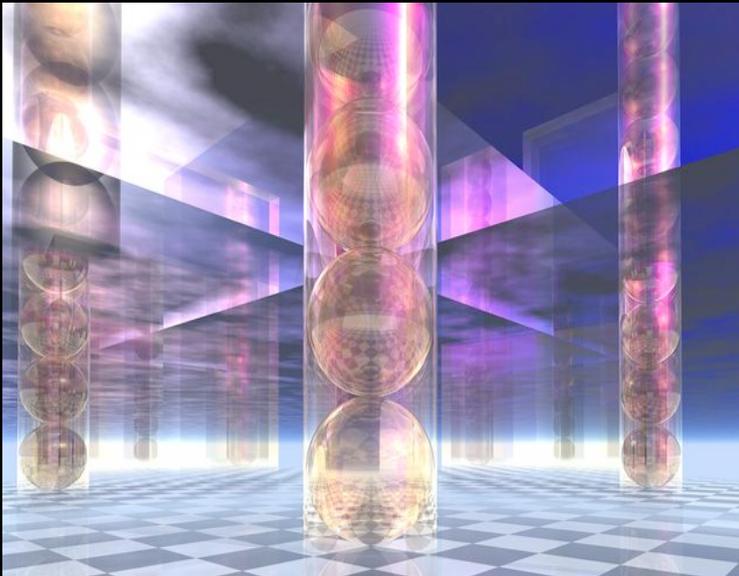

Emergent Evolutionary Eventstream - Operational Ecology Continuum

- Knowledge complexity, scale, and velocity is exceeding human capacity for mission critical decision rendering compressed into ever shortening time scales.
- Development and deployment of complex metasystems of artificial autonomous entities, synthetic lifeforms, and emergent intelligences becomes the acceptable if not mission critical “culture norm” of the near future.
- Perceived boundaries of the “synthetic” and organic, the “virtual” and the real, are becoming enmeshed into an operational ecology continuum.

Contextual Cognition in the Emergent Operational Ecology > Hyperdimensional Existence Navigation

Artificially Enhanced Complexity Management - Process Control

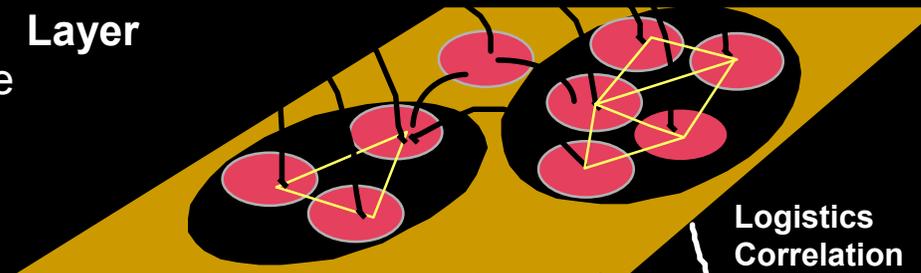

Autonomous Enhancement Enabled Decision Rendering Process Map

Resource

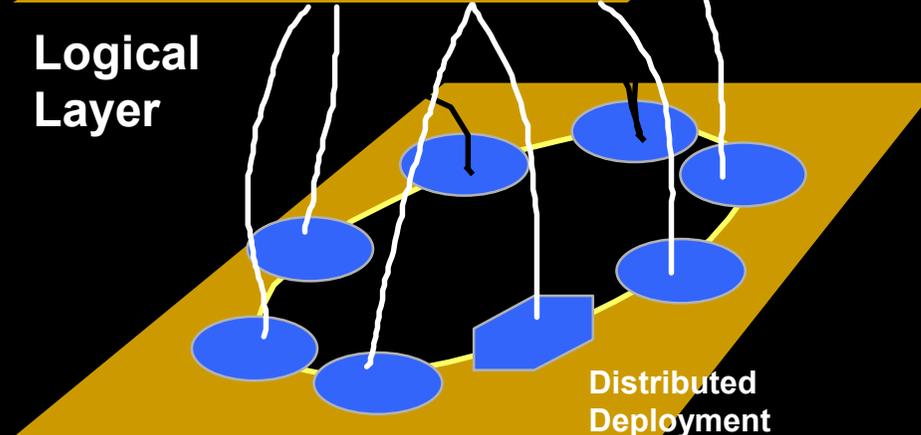

FUNCTIONAL MAP - Conceptual partitioning of functional domains

Situation Layer

LOGICAL MAP - Functional partitions are separated into localized "process domains"

Logical Layer

DEPLOYMENT MAP - Process domains are mapped onto distributed deployment sectors.

Decision Layer

- IT Resources & Infrastructure
- Data / Knowledge Services
- Process Integration
- Workflow Management

The Ubiquitous Synthetic Sentience Process Manifold

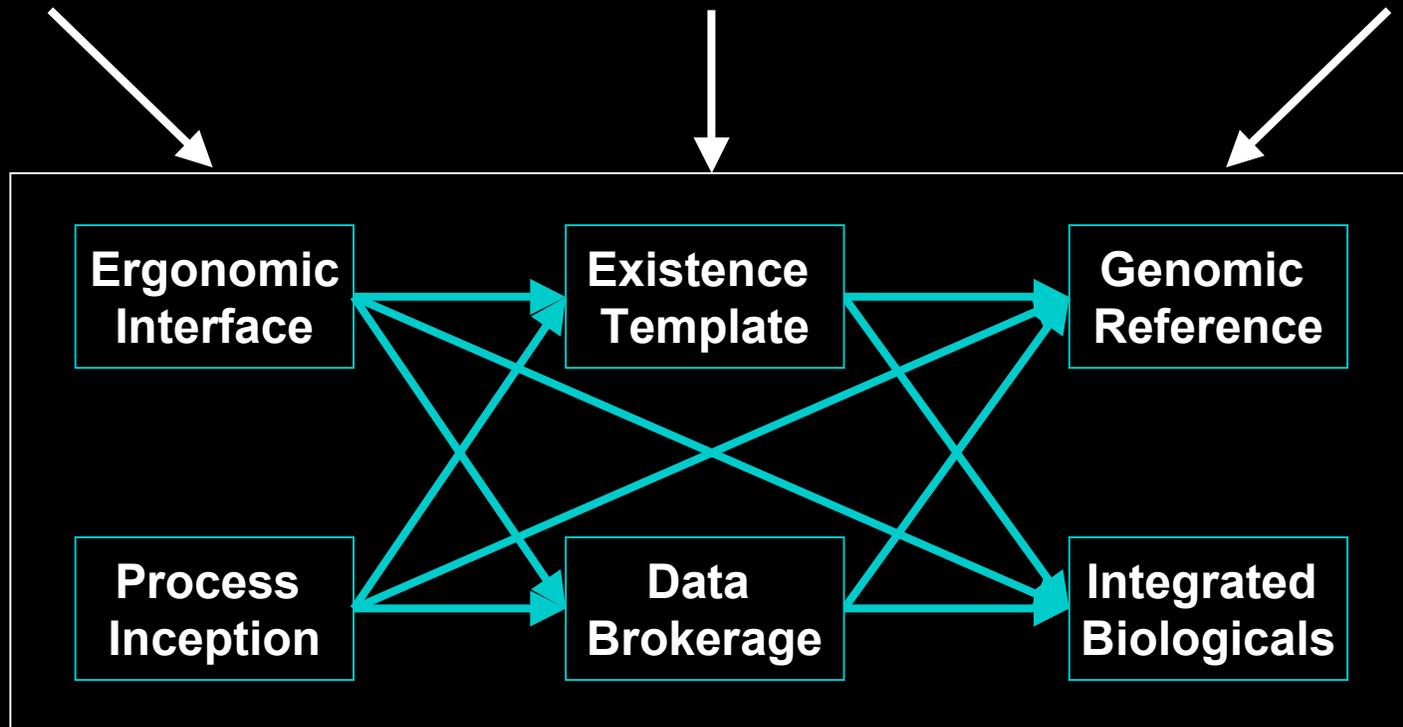

Existence Valuation System Architecture

Transaction layer

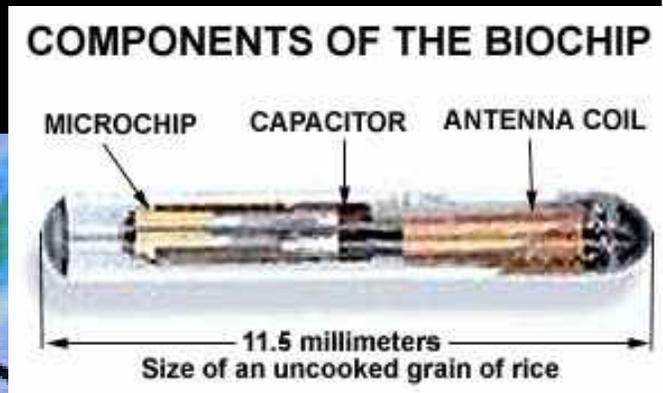

Ubiquitous data grid

Biological Substrate

Ubiquitous Existence Monitoring

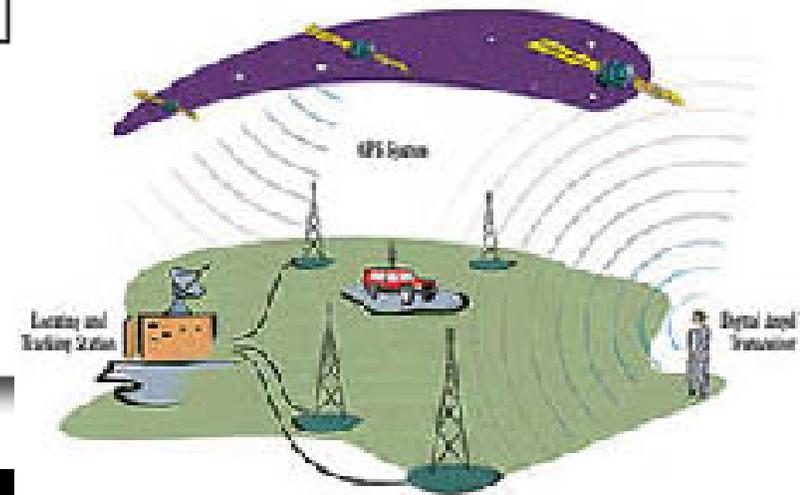

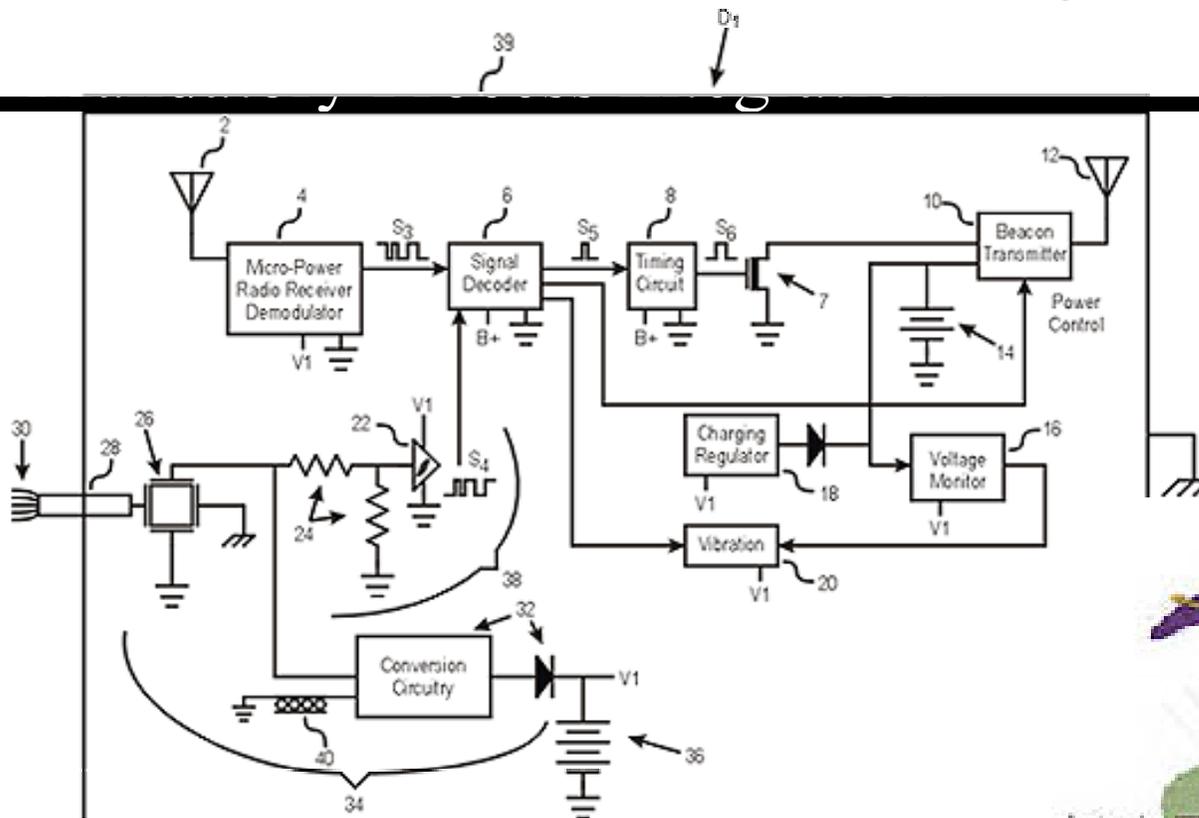

- Transition from exobiometrics
- Mandatory Process Integration

Ubiquitous Existence Monitoring

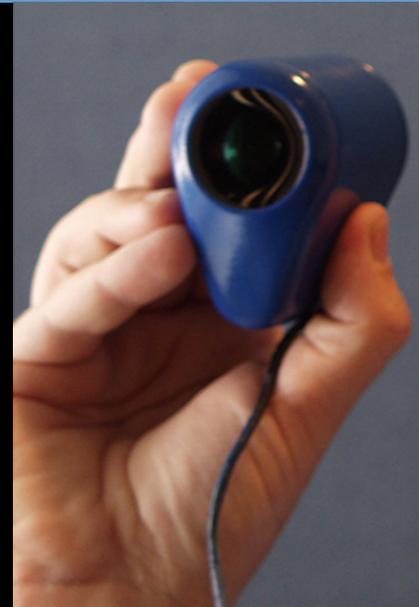

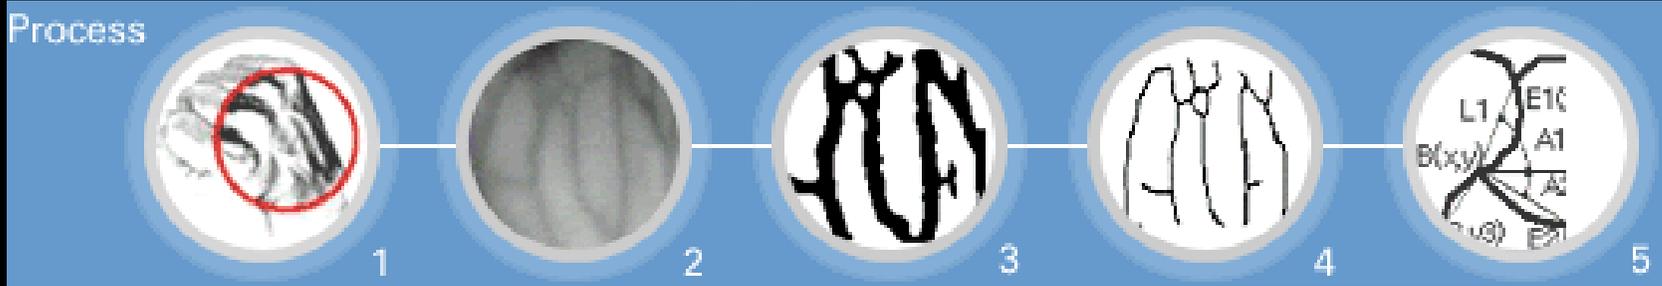

U.S. Patent 5,629,678

May 13, 1997

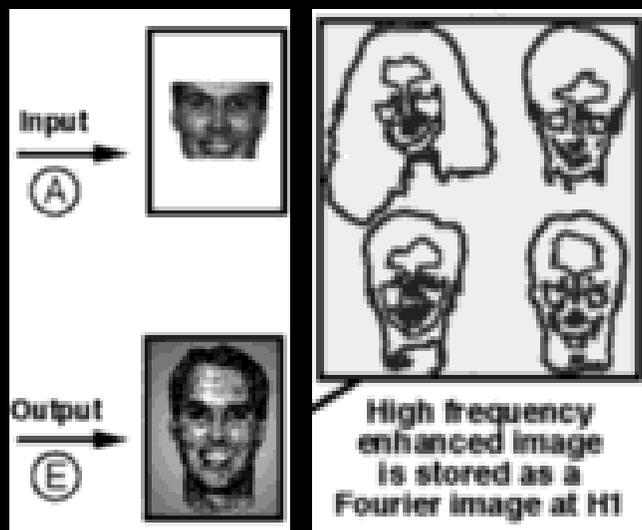

Presence Acquisition and Acknowledgement

- Transition from exobiometrics
- Mandatory Process Integration

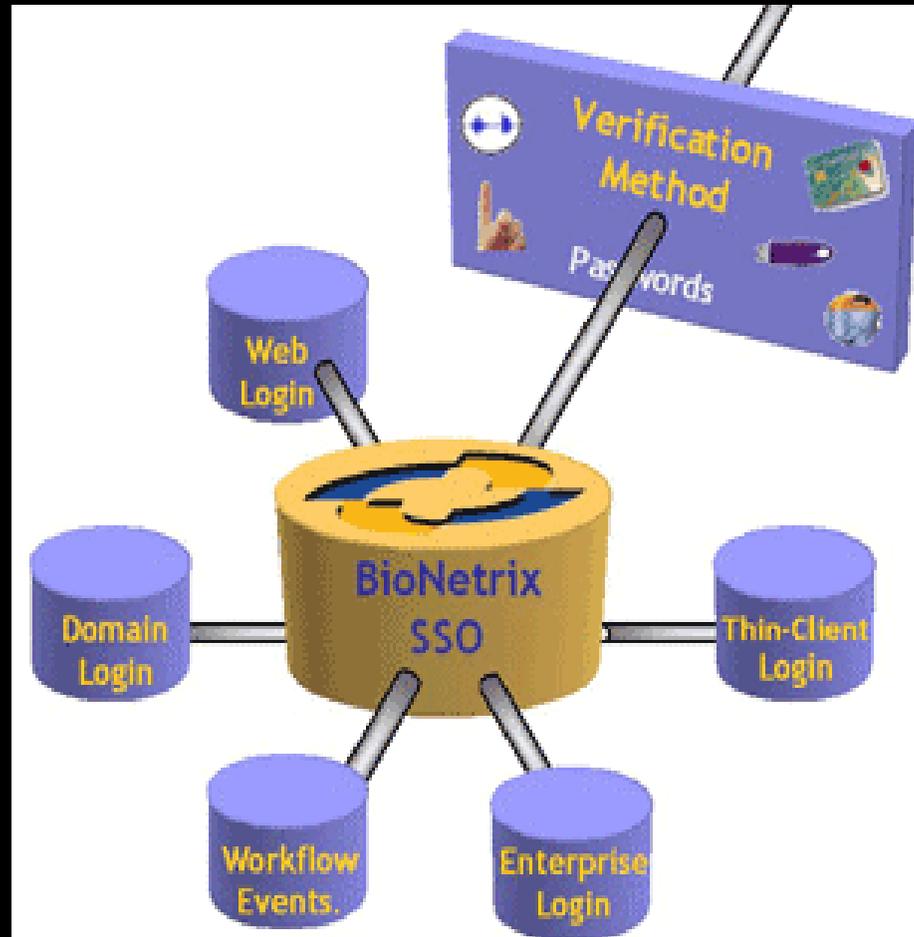

Content Addressable Feature Recognition

- Fourier / Holographic
- Wavelette
- Fractal

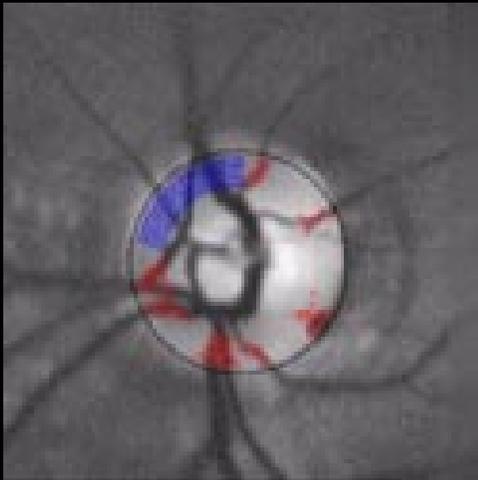

Biometric Process Management

- Process Transceiving portal
- Presence Acknowledgement
- Process Access / Distribution
- Definable Boundary Porosity
- Sovereign Knowledge Domains
- Scalable POT (Point of Transaction) Performance Metrics

Ubiquitous Access Portals

- Biometric Transaction Coupling
- Optional Process Integration
- User Transparency

Everywhere**

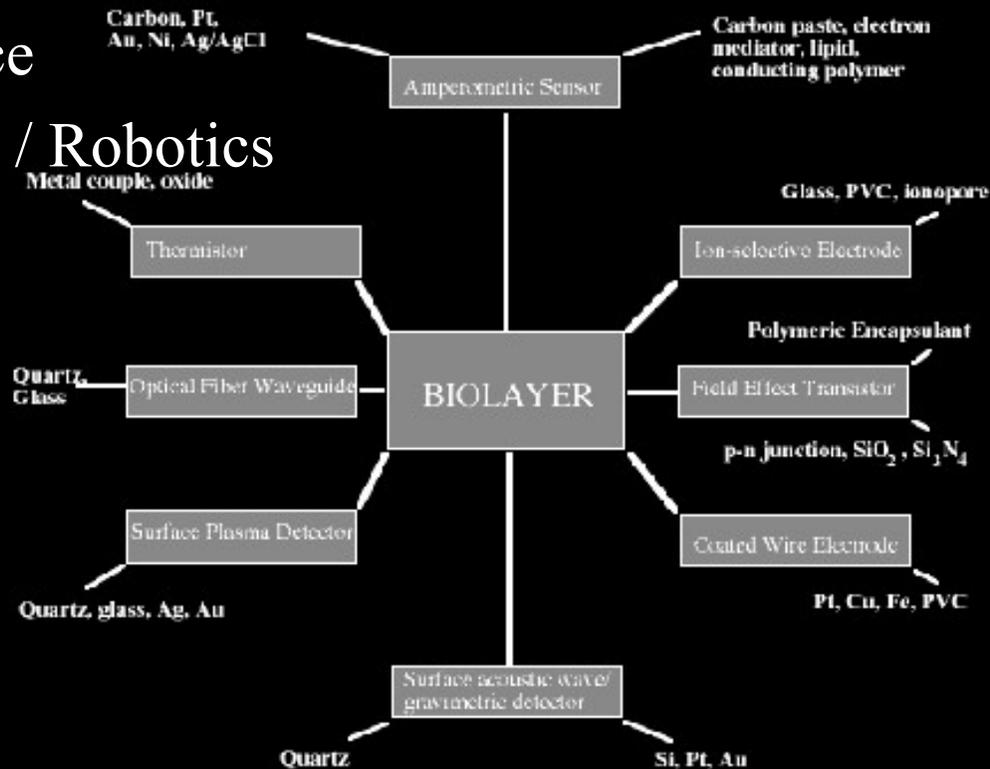

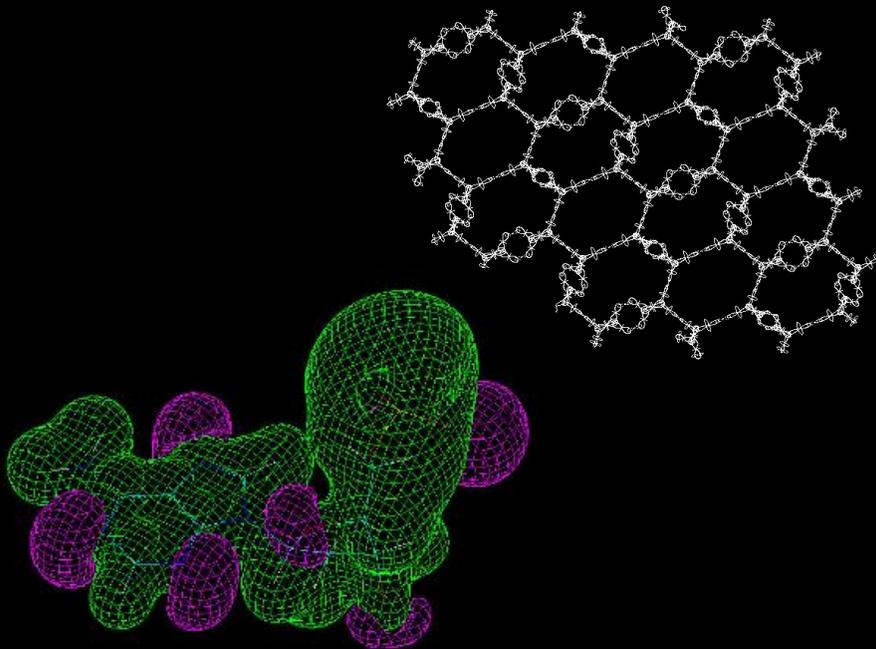

**Digital Process
Convergence**

**Process
Brokeraging
Architectures**

Major Development Domains of the Emergent Operational Ecology

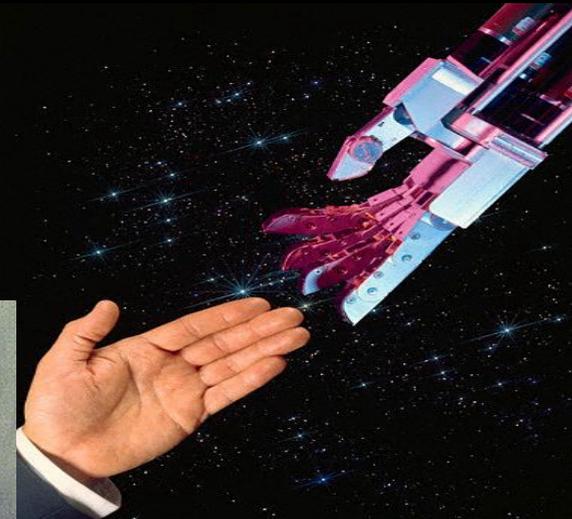

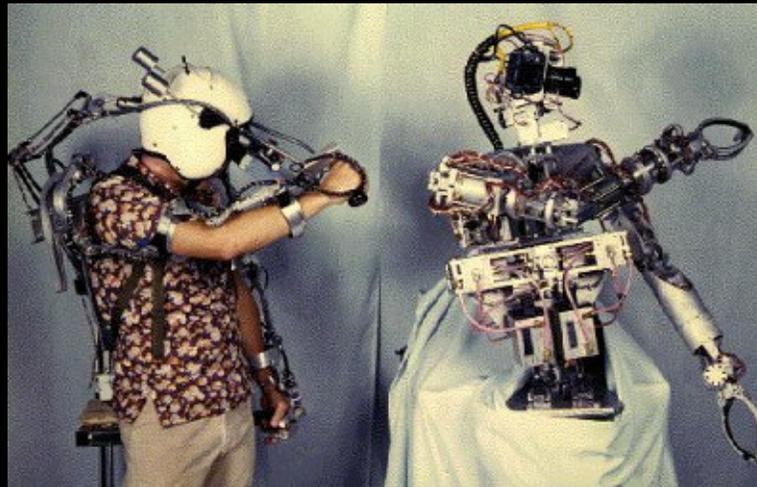

- Nanostructured Materials – stealth, protection, intelligence, self healing systems
- Telecomm / Computing / Embedded Intelligence
- Sensors / Detectors / Surveillance
- Integrated Autonomous Devices / Robotics

Primary Objectives:

DARPA - Defense Advanced Research Projects Agency

- Keep human soldiers from harm
- Enhance human capacity, assisted enhancement
- Emphasis on “smart” technology instead of “replacement” technology

Soldier of the Future – Define “Soldier”

- *Institute for Soldier Nanotechnologies*

NBIC Convergence

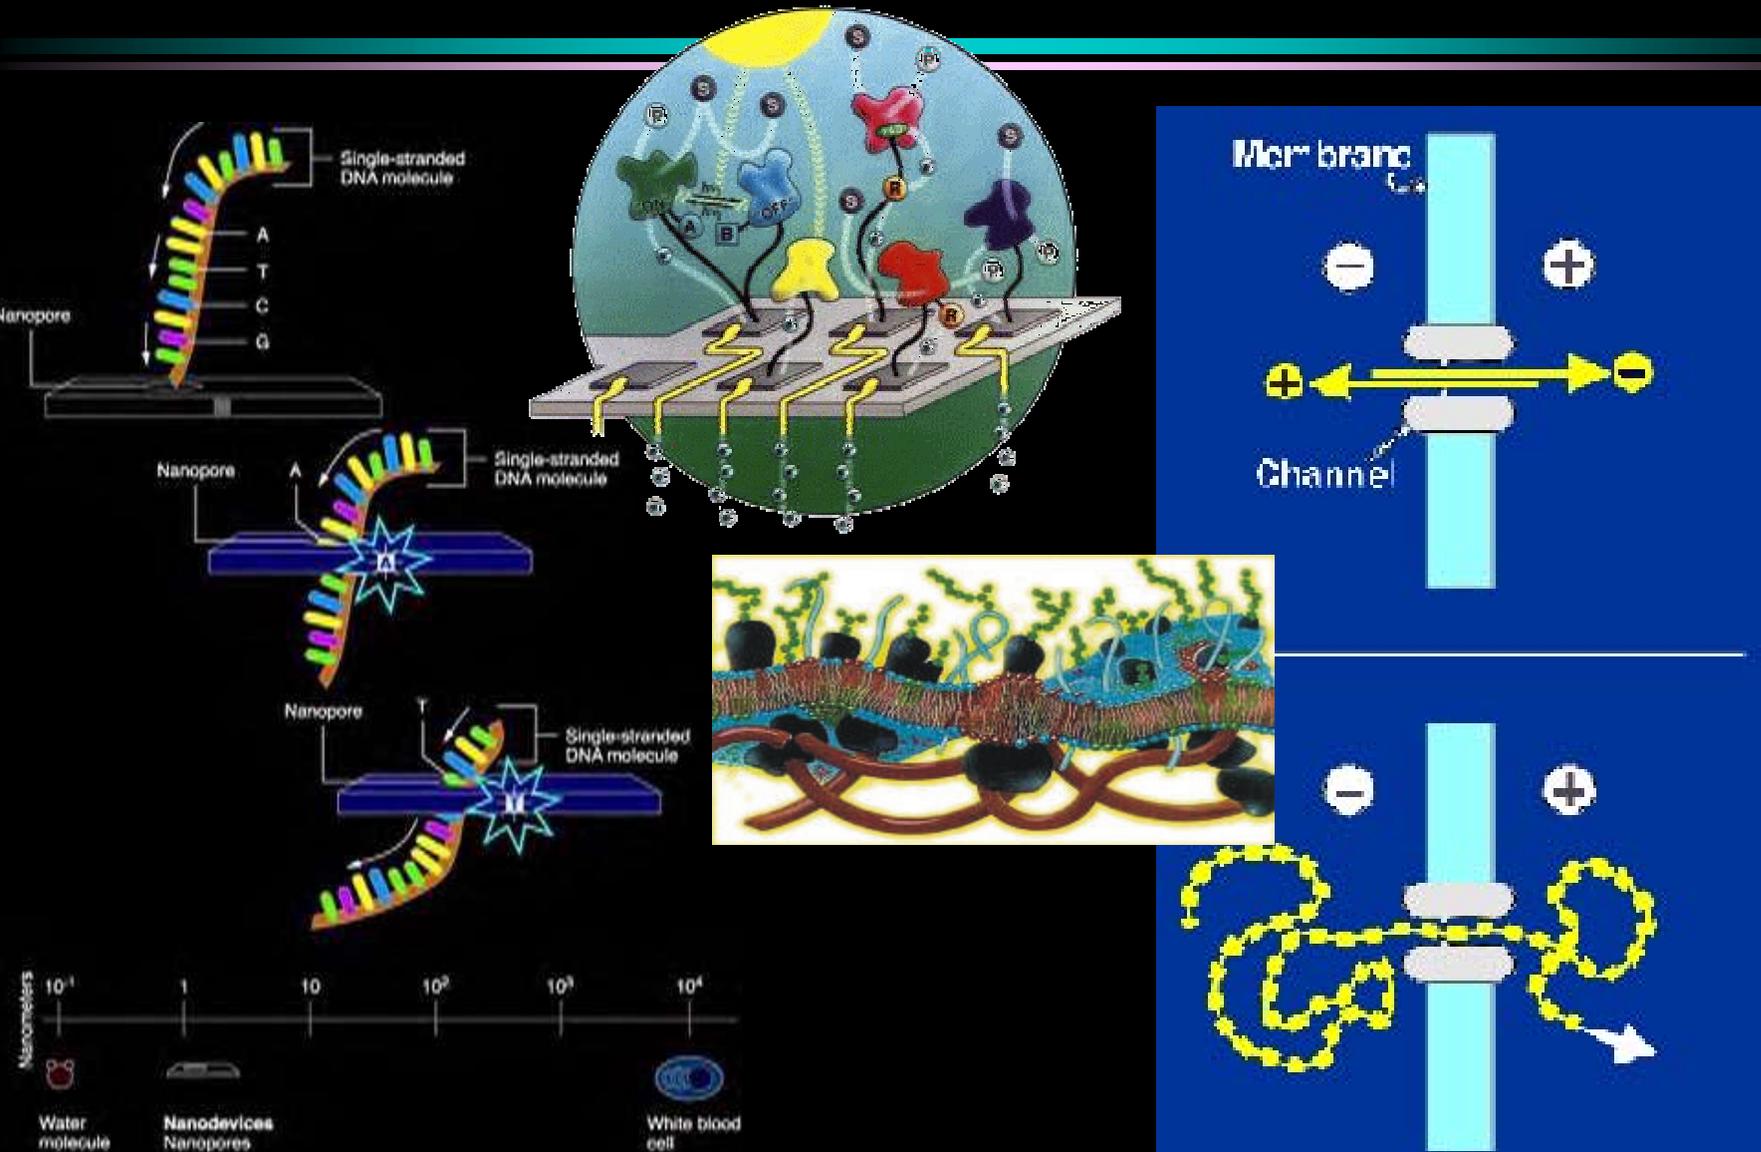

Future arenas of Advanced Materials, Integrated Systems, Adaptive Process Morphology

- Micro-nano satellite “colonies”, autonomous vehicles, intelligent swarms
- “Smart” autonomous robots, distributed sensors, intelligences, artificial entities
- Integration of humans and autonomous intelligences
- Self healing / adaptive adaptive materials, systems, networks
- Anticipatory response to hyper-virulent, xenomorphic nano-organisms

Nanoporous Materials, Selective Membranes

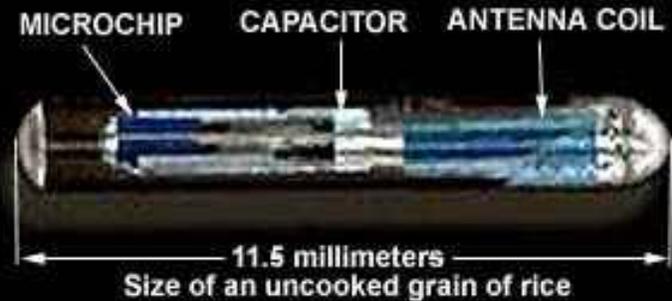

“Smart” Skin / Integrated Molecular Sensors

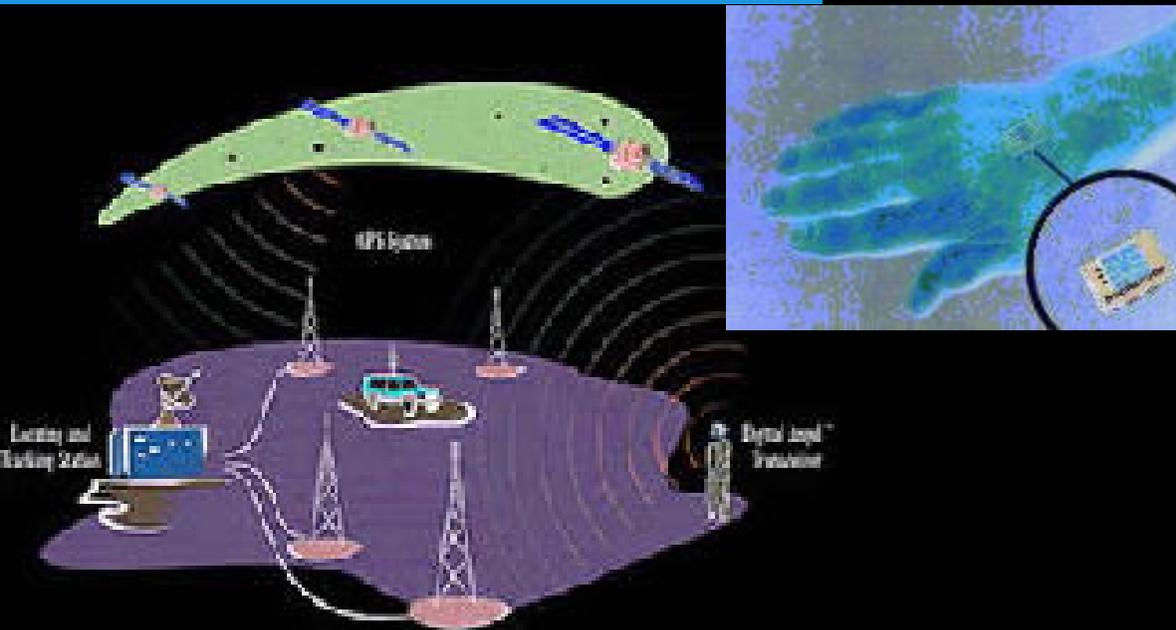

Integrated Human & “Virtual” Operational Ecologies - Future Biometric Immersion

Digital Angel™
CORPORATION

COMPONENTS OF THE BIOCHIP

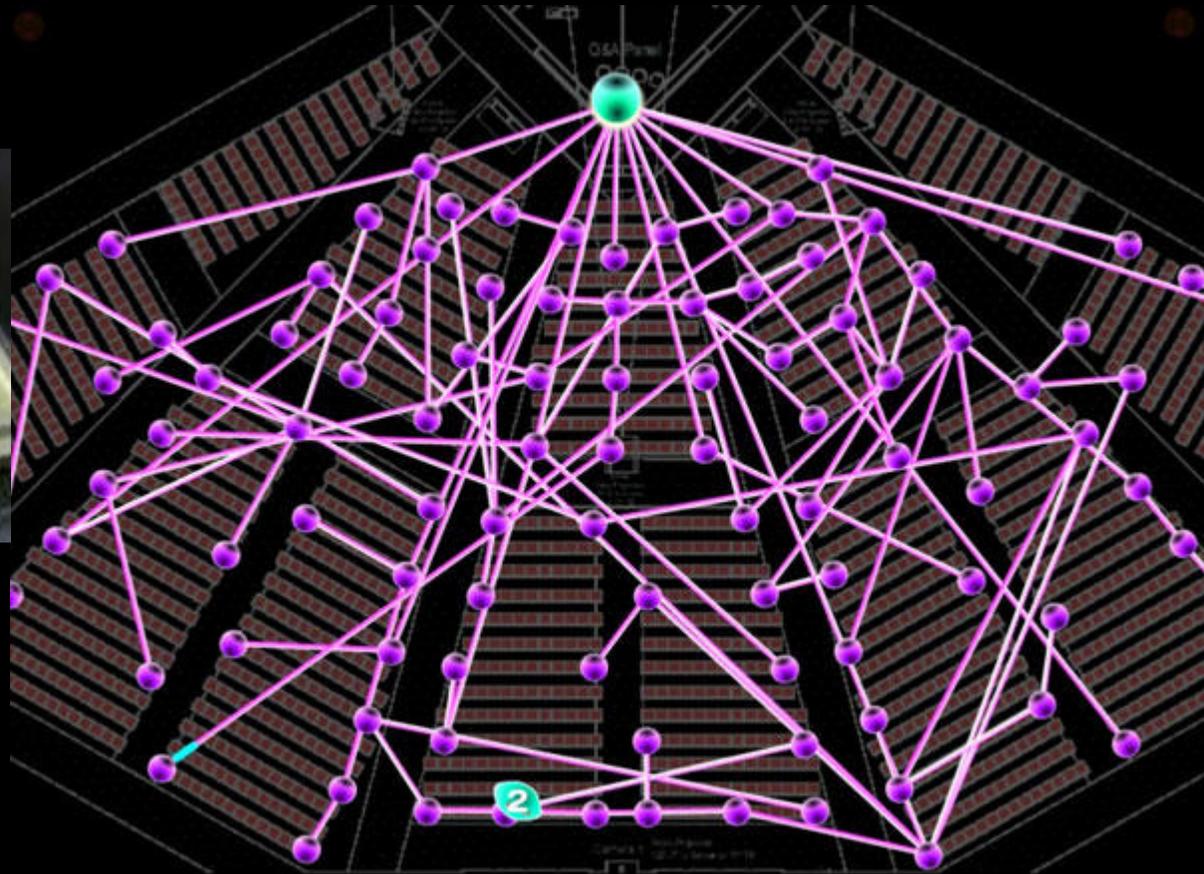

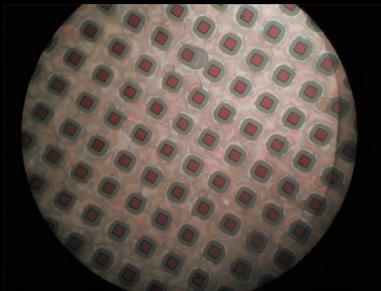

- Biochip Implants
- Distributed Sensors
- “Smart Dust”
- Molecular Sensors

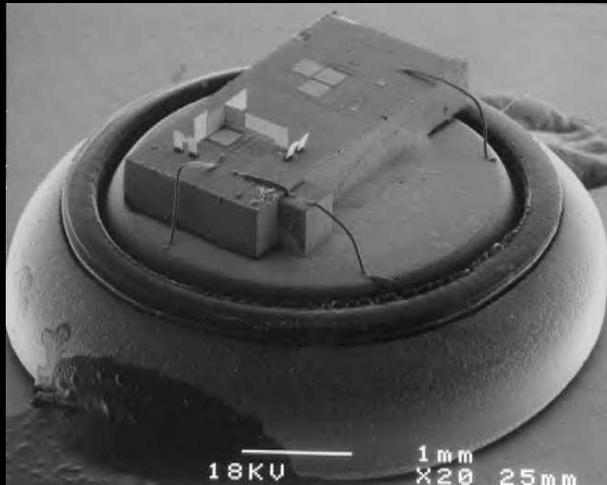

“Smart Dust”

Biometric Immersion

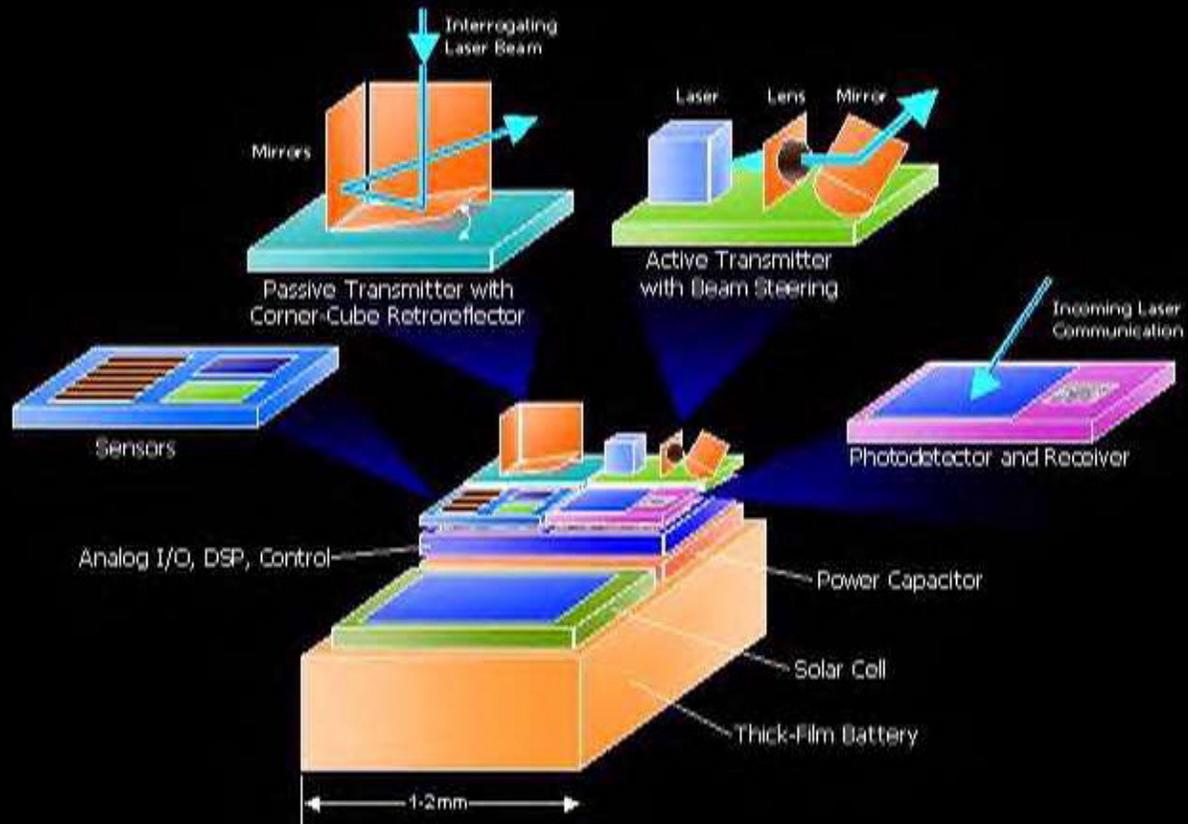

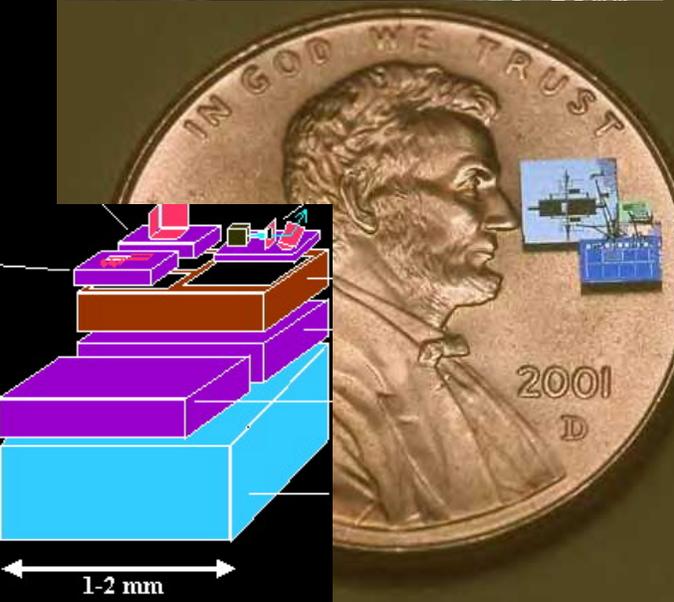

- Sensor “Swarms”

Future Biometric Immersion

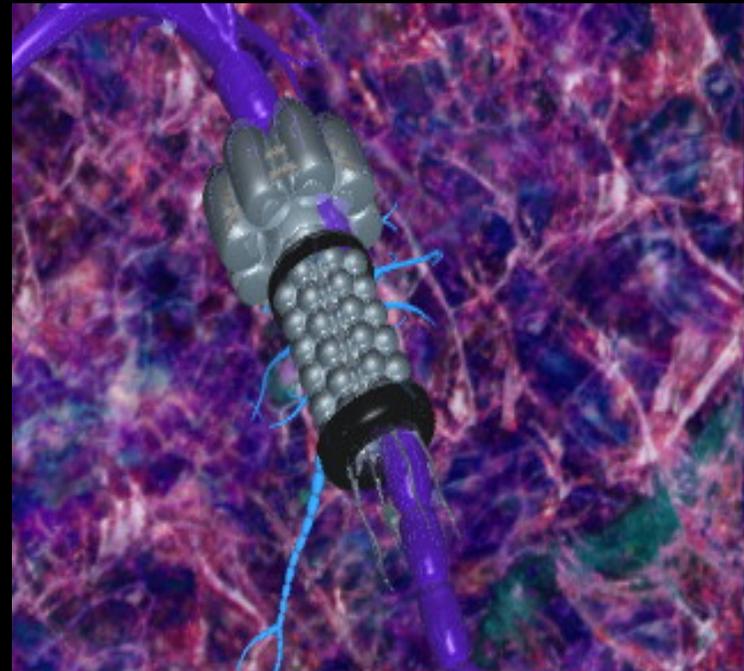

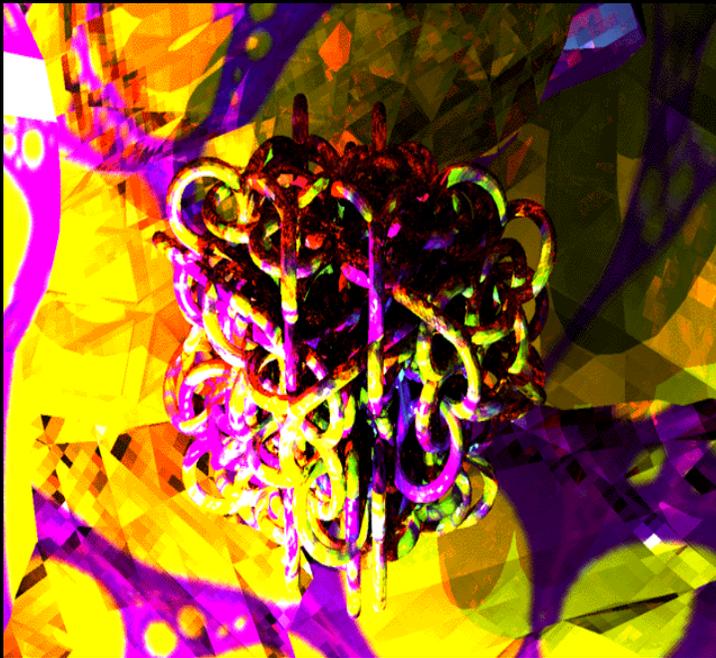

- Autonomous Distributed Entities
- Ubiquitous Presence Monitoring

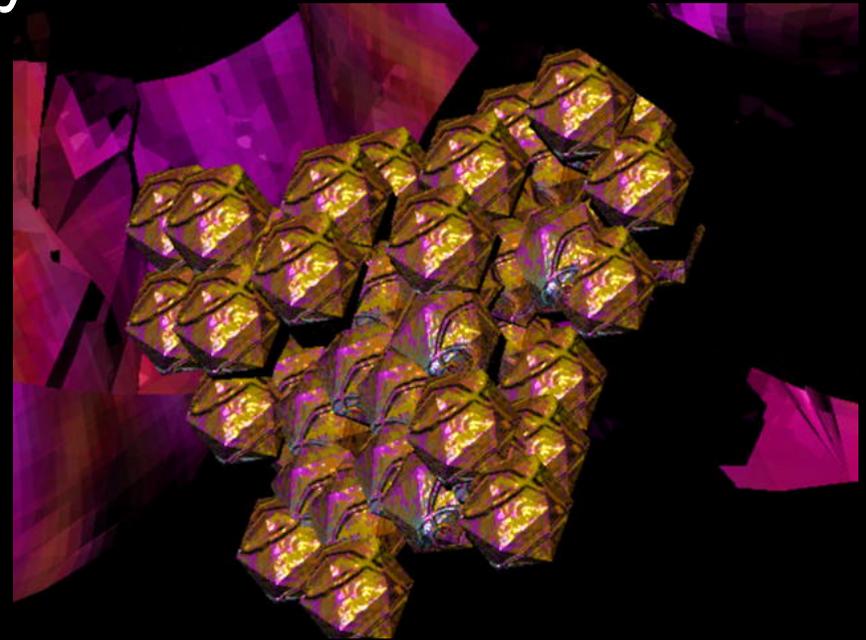

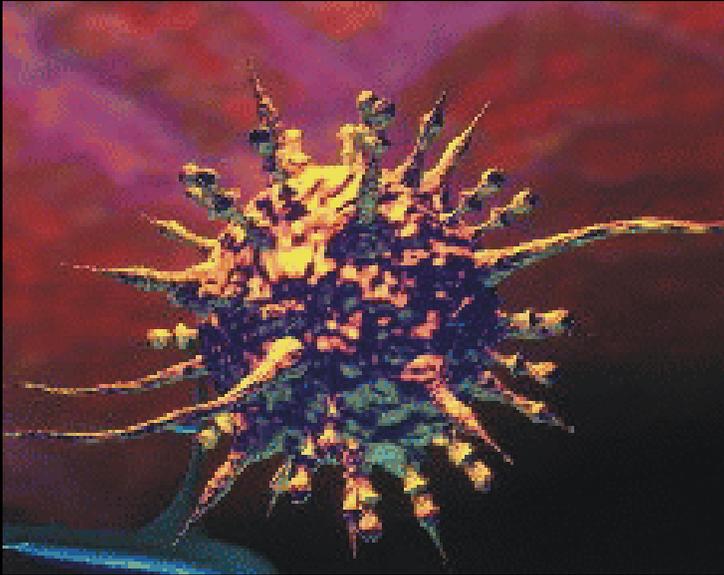

Cellular Cybernetics

- Cellular Delivery Systems
- Enhancement / Repair Biodevices

God on Demand - the Next Emergent Process Deliverable

- Hybrid Lifeforms
- Synthetic Organisms
- Integration of Living Systems

The diagram features a central title, "Process Dynamics of the Emergent Operational Ecology", rendered in a bold, green, serif font with a white outline. This title is surrounded by four blue circles, each containing a concept in a bold, red, serif font with a white outline. The circles are positioned at the top-left, top-right, bottom-left, and bottom-right. The background is a dark, swirling pattern of light blue and white, resembling a vortex or a complex network.
